REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: None of the prior art shows a die separation assembly for separating adhesive wafer saw tape from the plurality of dice comprising a support base with a support surface and a down ramped portion, a feed tray adjacent the second portion of the support base, and a flexible platform movably supported on the base support surface for movement from the first portion to the second portion of the support surface for holding the singulated wafer adhered thereto via the saw tape such that the flexible platform and the saw tape are transported into the gap between the support base and the feed tray while moving the dice onto the feed tray.

McKenna et al. and Pak are both similar to the instantly claimed invention except neither reference shows a flexible platform for adhering the saw tape, instead the saw tape itself is pulled along a support base by a roller below the gap between the support surface and the feed tray. In addition, there is no prior art which would suggest adding a movable, flexible platform to the apparatus of either McKenna et al. or Pak.

Martinsen and Schroeder et al. are indicative of apparatuses that pull a label web such that the labels and backing web are moved along a support surface, the backing web enters a gap between the support surface and a feed surface, and the labels are moved onto the feed surface.

Japanese Patent 52-27352 shows a sheet separation plate with a slot through which a saw tape is pulled away from the dice.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
